

The TX cables of the GroundTEM Ralli **MUST NOT** be connected to the instrument when switching it on

Failure to observe the following power-on procedure could damage the system

START	STEP 1
<p>GroundTEM Ralli instrument is in its “off” state.</p>  <ul style="list-style-type: none">- No TX coil connected- No internal / external battery connected- Lights off	<p>Insert the RX battery and wait 5 seconds.</p> 
STEP 2	STEP 3
<p>Plug in the TX battery</p>  <p>Battery case</p>	<p>Switch on instrument</p> 
STEP 4	CONNECT TX LEAD-IN CABLE
<p>Wait for TX & RX lights to show.</p> 	<p>Attach TX coil to instrumentation.</p>  <p>Battery case</p>
